

SELF QUESTIONS/SELF CHECK MODULE 12

1. **Who can achieve peace?** Based on the module, achieving peace isn't just up to politicians or leader because it actually depends on every single one of us. We can't just sit on the sidelines, cross our fingers, and expect someone else to do all the hard work. Instead, we have to step up with a "pioneer" mindset and actually put our words into action. If everyone does their part and realizes that we are all "messengers of peace" in our daily lives , then true peace in the region is definitely possible.
2. **Do you think Bangsamoro Organic Law is effective in addressing the call for autonomy in our Muslim brothers?** Yes, I really think the BOL is a massive step in the right direction. The old ARMM setup honestly didn't work because it was way too dependent on the national government in Metro Manila, which forced regional leaders to basically "beg" for their own funding. The BOL changes everything by giving BARMM real, meaningful autonomy alongside an automatic budget of P60 to P70 billion every year. Because they finally have the financial independence and the exclusive powers to manage their own region, it directly answers their long-standing demands. You can really see how effective this agreement is just by the fact that the MILF is finally fulfilling its promise to decommission 30,000 soldiers and give up their firearms after decades of conflict.
